ACHIEVEMENTS

Hackathon: [Hackasuly](#) (2019), As Sulaymaniyah
First prize winner for the AI category.

EDUCATION

University of Human Development, Information Technology - Graduate

WORK EXPERIENCE

[Rozhi spi](#), Sulaymaniyah

3 Months long in 2018

Position: Junior Developer(C# Fullstack)

- Developed the frontend and half of the backend for an accounting application, fulfilling all requirements.

[Plus the edge](#), Sulaymaniyah

2019 - 2020

Position: Frontend Developer(Vue + Web design)

- Designed and developed frontends for various applications, including Hospital, Warehouse, and Restaurant Management Systems, as well as a restaurant food ordering app with PayPal integration.

[Rudaw](#), Erbil

2021 - 2022

Position: Full Stack Web Developer(Vue + Web design and laravel backend)

- Designed and developed component-based Vue.js applications optimized for mobile use with a focus on smooth, efficient user experience.
- Implemented lazy loading, and data retrieval optimization using Redis caching.
- Optimized and refactored legacy code written by other developers.
- Employed Server-Side Rendering (SSR) and Static Site Generation (SSG) techniques to optimize website performance and SEO.

[Moonline](#), Sulaymaniyah

2022- 2023

Position: Frontend Web Developer(Vue + Web design)

- Surveyed SAP developers in order to create a custom form building solution using JSON and Strapi.
- Designed a schema for the form database and integrated it with the Strapi CMS to store and manage the form data.
- Conducted testing and debugging to ensure the solution was reliable and efficient.
- Provided documentation and training to the development team to enable them to create custom forms using the new solution.
- Collaborated with the development team to identify areas for improvement and made updates to the existing codebase to enhance performance and functionality.
- Debugged and resolved issues in the legacy code, while ensuring backward compatibility with the existing system.
- Developed new features and integrated them seamlessly with the existing codebase in a very short time.
